

QUIC-SWING FLIP-DOWN 180° SCBA BRACKET

Description

Moving SCBAs out of the crew cab? Don compartment stored SCBAs from a comfortable standing position.

Features:

- Bracket slides out over the lip of the compartment, then flips end over end to a convenient height for quick, safe, and easy donning from a comfortable standing position
- Great for storing first attack SCBAs outside of the crew cab and reducing firefighter exposure to harmful carcinogens
- Storing SCBA facing the rear of the compartment helps keep straps and hoses from being caught or damaged by the compartment door
- Two powerful locks, a tray lock and a backplate lock, hold the assembly firmly in place until needed. Spring clips and a positive holding strap keeps SCBA secure.
- Minimizes straining and injury caused by reaching upwards for a heavy SCBA
- Allows for easier inspection of SCBA and harness

Specs:

- For compartments with 24-1/2" H x 12" D minimum usable space
- Lowers SCBA valve 14-1/2" from compartment shelf
- Extends SCBA harness approx. 21" from the apparatus sidewall

Models Available:

- 30-Min. 4500 PSI Cylinder: Model QS-FD-180-5
- 45-Min. 4500 PSI Cylinder: Model QS-FD-180-6
- Unit Less SCBA Bracket: Model QS-FD-180-LB
- 30-Min. 5500 PSI Cylinder: Models QS-FD-180-LB + SC-50-H-5-SFPHS
- 45-Min. 5500 PSI Cylinder: Models QS-FD-180-LB + SC-50-H-6-SFPHS
- 60-Min. Cylinders: Models QS-FD-180-LB + UH-7-60-2-PHS + NEF
